

EHF Development - Foster Programme Administration Guide

The EHF Foster Project is aimed to establish cooperation between EHF, emerging Handball Nations and developed Handball Federations in Europe.

The EHF tries to encourage Handball Federations to adopt each an emerging Handball Federation. These developed Handball Federations and the EHF shall support an emerging Handball Federation based on a mutual agreement for a certain period.

The idea is to establish a well functioning system adapted to the needs and preconditions of the respective National Federations by:

- Nomination of lecturers to courses
- Inviting teams to competitions
- Inviting participants to national courses
- Exchange information material
- Allowing a look behind the science of successful Handball management (coaches & referees education, national development programmes, etc.)

The EHF will support such co-operations by:

- Material support
- Nomination of EHF Lecturers
- Financial support to the helping nations for arising costs
- EHF publications

If you are interested in receiving support within the Foster programme please send your application to rabenseifner@eurohandball.com.

In case of any questions do not hesitate to contact us!
Best regards
